Summary

Senior Product Designer with 10+ years of experience designing complex operational products, including POS systems, logistics platforms, B2B SaaS, enterprise tools, and internal software.

Strong in product discovery, workflow simplification, information architecture, design systems, and close collaboration with engineering and business teams. Focused on products used under real-world pressure, where speed, accuracy, adoption, and reliability matter.

Selected Experience

Senior Product Designer | Quray

Remote | 2026–present

Sole designer for an early-stage **music-tech startup: a touchless MIDI/CV controller** shown at Superbooth Berlin. Designed the web configurator for creating, organizing, and syncing presets, plus on-device navigation and stage-use interactions.

Career Break & Independent Projects

2024–2026

Planned break after intensive product work; used this time to explore independent creative and product projects and rebuild my workflow around AI-assisted research and code-based prototyping.

Product Designer | Freelance Consultant

Remote | Selected projects 2020–2024

Consulted on enterprise platforms, government services, e-commerce, internal tools, and B2B operational products.

- Designed a **digital training and onboarding platform for Subway**, reducing onboarding time by 40% and increasing certification rates by 60%. [Case Study](#)
- Adapted quickly across unfamiliar domains, turning complex requirements into clear user flows, information architecture, and production-ready interfaces.

Senior Product Designer | Billfold POS (US startup)

Remote | 2017–2023

Led end-to-end product design for a cashless payment ecosystem used at large events and stadiums worldwide, evolving from an early hardware prototype into a scalable tap-to-pay platform. [Case Study](#)

- **Increased per-person guest spend by up to 60% and boosted venue sales by 50%.**
- **Designed RFID wristband and POS systems** for high-volume venues with up to 8,000 guests.

Lead Product Designer | Gazelkin Logistics

On-site | 2017–2019

Designed a connected digital ecosystem for a cargo transportation company including driver apps, dispatch tools, call-center systems, and customer booking platforms. [Case Study](#)

- **Cut order processing time by 40% and reduced delivery errors by 70%.**
- **Launched a driver app with 92% adoption** within 3 weeks.
- **Tripled customer order volume** with redesigned booking experience.

Lead Product Designer | CSI / Dreamkas

On-site | 2014–2017

Led UX for Russia's first widely adopted touchscreen POS and self-checkout systems, used by thousands of stores and frontline staff with low digital literacy. [Case Study](#)

- **Created point-of-sale and self-checkout systems** for major retailers (e.g., Lenta, SPAR, OBI).
- **Sped up transactions by 25%, reduced cashier training by 60%, lowered user error by 40%.**
- **Built a scalable design system** across hundreds of screens and **grew the internal design team.**

Core Competencies

Product strategy & UX leadership: Discovery, problem framing, end-to-end product design, and workflow simplification from concept to delivery.

Collaboration: Engineers, PMs, QA, and stakeholders; technically feasible delivery.

Research: User interviews, field research, usability testing, journey mapping, and workshops.

Delivery: Developer handoff, accessibility/WCAG, scalable documentation.

Tools & AI: Figma, Cursor, Lovable, Claude, Adobe CC, AI-assisted design workflows and prototyping.

Domains: B2B SaaS, enterprise UX, internal tools, POS, logistics, operational workflows

Education

Master's / Engineer's Degree, **Computer Engineering**, ITMO University

Bachelor's / Second Degree, **Graphic Design**, State Polytechnic University
